

ONE by Ferlin

**ATTEND THE
WORLD EXCLUSIVE PREMIER
OF OUR NEWEST DOSING MACHINE**

**Hall: 10
Stand: B46**

Lightweight design does the trick

Due to its light construction and small weighing cell it is able to measure small doses. Hence, it is 6x more accurate than market standards.

A belt instead of a dosing screw

Screws or similar create pulsating dosages and thus an inconsistent dosing behaviour. The Ferlin One uses a belt instead of a screw, which results in consistency.

An all-inclusive interface

Our user friendly interface contributes to an inclusive labour market. It is intuitive and self explaining.

Specifications

3kg	Loadcell
7,5 liters	Capacity hopper
15 kg	Total weight including control
6 bar	Compressed air
240v 50/60Hz	Power supply
45W	Energy consumption
0-25 kg/h	Dosing capacity
